Controlling Claims- Early Intervention Saves Cost

When things go wrong in business, the financial consequences can be severe. At Beecher Carlson, we aim to reduce the cost of loss early in the insurance process with in-depth pre-loss consulting that helps control risk, preserve assets and paves the way for superior post-loss response. We realize that an insurance policy cannot compensate you for the long-term losses if business moves to a competitor while your operations are down. Getting you back in business as quickly and efficiently as possible, in the event of a loss, is our top priority.

Servicing Claims- Advocacy Ensures Prompt Settlement

At Beecher Carlson, we believe in claims advocacy and management not simply claims monitoring. We are on your side through the entire claims process, going beyond what is expected to ensure quick and appropriate resolution. By providing consistent and ongoing oversight, we contribute significantly to reducing your cost of risk. Our experienced claims advocacy team works with you throughout the claims process to:

- Coordinate and facilitate with all involved persons: carrier adjusters, independent adjusters, forensic accountants, and internal risk management
- Provide full or partial claims management from claims notification to settlement
- Provide claims analysis and trending with specific recommendations
- Provide advocacy and assistance in claim resolution
- Participate in the development of response to carrier coverage concerns

Our goal is to get you back in business and insure that you receive all the benefit of your insurance products. Beecher Carlson Claims Services Team will help you navigate the claims process effortlessly and contribute significantly to overall cost savings.

Passion. Innovation. Accountability.
